

Who we are: A results-oriented SBA small business that partners with senior federal leadership to power mission success through secure distributed systems, systems integration, big data solutions, and actionable insights

Mission: Accelerate federal innovation and operational excellence through data transformation, agile software development, low-code/no-code solutions, big data insights, and cloud adoption. As a nimble small business, we rapidly adapt to your evolving needs, delivering tangible results aligned with your strategic goals.

Areas of Practice

Cloud Strategy & Digital Transformation: Rely on us to accelerate modernization, optimize cloud costs, and maximize agility with our expert guidance on AWS, Azure, and GCP. We tailor strategies to your unique needs, ensuring seamless migrations and scalable cloud solutions.

Agile Software Development & Integration: Let us unlock efficiency and scale with custom software solutions tailored to your specific needs. We prioritize performance, seamless integration, and process optimization to power your business growth.

Big Data: We help federal agencies harness the power of vast datasets (terabytes). Our experts architect data lakes, data warehouses, and advanced analytics systems enabling insight-driven decision-making and a competitive edge.

AI Platforming: Consultation on Generative AI and neural network architecture, and system integration of cutting-edge Large Language Models (LLMs) to revolutionize data interaction and optimize operations.

Differentiators

Industry Expertise: Adapt proven solutions from diverse industries (Civilian, DoD, Health, Treasury) to solve your agency's distinct challenges. Accelerate time-to-value with our transferable insights.

Understanding the "Why": Vetted guidance by expertly evaluating technology fit. Identify strengths, limitations, drive strategic alignment, maximizing ROI and minimizing risk.

Outcome-driven thinking: Boost your bottom line and operational efficiency with solutions that reduce costs and speed up processes

Outcome-Driven Approach: Rapidly achieve strategic objectives with our agile, results-oriented solutions. Experience faster time-to-value and measurable returns in a dynamic market.

Iterative workflows: Accelerate innovation with a rapid MVP cycle: Validate ideas, gather insights, and refine products for maximum impact.

Experienced: Drive mission success across federal agencies with our expertise as a proven consulting partner on prime contracts.

Past Performance

DIA: Accelerated build, deployment, and scaling timelines for a large-scale project by maintaining 150+ AWS EC2 instances and a 90-microservice containerized architecture. Expertise in Java/Scala/Python/Go and backend stores (Redis, ElasticSearch, PostgreSQL) within the Amazon GovCloud.

CMS: Accelerated delivery and drove cost savings for 2 public-facing API products. Transitioned from AKAMAI to AWS firewall (a direct cost reduction to the PMO), and mentored engineering teams for improved code quality.

TSA: Built secure data pipelines connecting Salesforce cloud and on-prem TSA systems, streamlining real-time data sharing for decision-makers. Our team worked closely with the PMO to design compliant APIs that adhered to ISSO security guidelines.

GSA: Partnered with 18F to rapidly deliver an MVP web application streamlining audit reporting (using agile sprints). Enabled smooth handover for successful 18F deployment within 120 days..

Marriott: Optimized performance and scalability of the agency's Digital Shopping Platform (DSP), improving public access to their online booking system. Contributed to development, maintenance, and enhancement of the Digital Shopping Platform (DSP).
